Widney	ENVIRONMENTAL POLICY	
Document Number	Policies-3	Page 1 of 1

Revision	Date	Description of Changes
D	12/12/17	Changed to include scope and life cycle

Widney is one of the countries leading designer and manufacturers of:

- Window systems and sun blinds for specialist vehicle applications.
- Telescopic slides and associated fabrications.

The organizational goals are to provide world class products, which continually satisfy applicable legal and regulatory requirements and the expectations of our customers in all respects of quality, cost, performance, safety and reliability.

Widney products are distributed internationally and the company recognises that its processes and products do impact on the environment so it is committed to improve its performance through the following measures:

- Comply with relevant environmental legislation, industry codes of practice and customer requirements.

- Seek to reduce environmental impact and prevent pollution in the formulation of our products and manufacturing processes.

- It is our aim wherever possible to consider the environmental impact of our processes and products at every stage of the product life cycle. Materials used in the manufacture of our products are typically recyclable by the end user.

- Openness and dialogue with our employees, the public and other interested parties on all environmental matters will be communicated through the use of Widney notice boards and electronic open access.

- We will set objectives and targets to drive continual improvement programmes and regularly review environmental performance to ensure success.

- Widney recognises the importance in training and empowerment. Our people are our strength and their continuing development is the duty of management at all levels. All personnel have the support and authority to work within the scope of their environmental responsibilities.

Our Environmental policy will be available to our customers on demand and displayed in reception and on internal notice boards for the public, employees and interested parties.
